## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

**Claims 10-13** are rejected under 35 U.S.C. 102(b) as being anticipated by **King et al.** (US 3,874,388).

**FIG. 9G****FIG. 9H****FIG. 9I****FIG. 9J****FIG. 9K****FIG. 10A****FIG. 10B**

Figures 9G-9K of the cited patent show the steps of delivering a plurality of anchors to a location adjacent an opening, delivering the anchors into tissue surrounding the opening, and removing the delivery catheter, wherein the anchors remain engaged in the tissue surrounding the opening following removal of the delivery catheter.

**Claims 14-18 and 20** are rejected under 35 U.S.C. 102(b) as being anticipated by **Cragg et al.** (US 5,868,762).

In the figures above, the Cragg et al. patent shows the method steps of providing a first tissue engagement structure and a second tissue engagement structure, both structures connected by a suture and being slidable relative to the suture, delivering the tissue engagement structures to the opening using a delivery catheter, engaging the tissue engagement structures with tissue adjacent the opening, sliding the first tissue engagement structure relative to the second tissue engagement structure, and removing the delivery catheter.
